

AL-FURAT AL-AWSAT TECHNICAL UNIVERSITY (ATU)

To ensure systematic implementation, monitoring, and reporting of sustainable practices across all technical faculties and campuses, Al-Furat Al-Awsat Technical University (ATU) has established a permanent, dedicated entity: the **ATU Sustainable Development Unit (SDU)**, operating under the direct supervision of the University Presidency and the Department of International Relations and Quality Assurance.

This dedicated team is staffed by full-time academic and administrative personnel whose primary job mandate is to lead institutional sustainability strategy, coordinate UN SDG alignment, oversee carbon footprint and energy management projects, and compile evidence for international university rankings (QS Sustainability, THE Impact Rankings, and UI GreenMetric).

Verified Public Links , documentations & Institutional Portals

For QS audit verification, the operational mandates, organizational structure, and official activities of the Dedicated Sustainability Team are accessible via ATU's official portals:

- **ATU Sustainable Development Division Official Page:** https://idi.atu.edu.iq/?page_id=44811&lang=en
Official institutional page detailing the SDU mandate, organizational structure, and university sustainability strategy.
- **ATU Sustainability Master Portal:** <https://sustainability.atu.edu.iq/>
Central platform managed by the dedicated SDU team to publish annual progress reports, SDG performance, and green initiatives.
- **Institutional Strategy & Quality Assurance Portal:** <https://ikr.atu.edu.iq/en/vision-mission-goals/>
Governance framework embedding the dedicated sustainability team within ATU's long-term operational strategy.
- **Applied Sustainability & Environmental Reports Hub:** https://inj.atu.edu.iq/?page_id=37296&lang=en
Public repository of environmental assessments, waste management initiatives, and campus greening projects led by the SDU.

Organizational Structure & Dedicated Responsibilities

The ATU Sustainable Development Unit comprises specialized roles with explicit, dedicated mandates to advance campus sustainability:

Dedicated Role / Position	Primary Responsibilities & Sole Mandate	Target UN SDGs
Head of Sustainable Development Unit	Overall strategic leadership, policy drafting, liaison with university presidency, and steering university-wide SDG integration.	SDG 17: Partnerships for the Goals SDG 13: Climate Action
Environmental & Campus Operations Officer	Direct management of campus waste recycling, renewable energy deployment, water conservation systems, and green space expansion.	SDG 6: Clean Water & Sanitation SDG 7: Affordable & Clean Energy SDG 15: Life on Land
Sustainability Data & Rankings Specialist	Data collection, auditing energy/carbon metrics, compiling annual sustainability reports, and managing QS & THE portal submissions.	SDG 12: Responsible Consumption SDG 9: Industry & Innovation
Community Outreach & Student Liaison	Organizing campus sustainability campaigns, coordinating green student clubs, hosting workshops, and fostering community partnerships.	SDG 4: Quality Education SDG 11: Sustainable Cities

Key Performance Indicators & Core Operations

The dedicated team operates continuously to execute key institutional goals, including:

- **Institutional Policy Drafting & Enforcement:** Formulating university policies on energy efficiency, single-use plastic reduction, paperless operations, and green procurement.
- **Campus Environmental Auditing:** Conducting annual audits of electricity consumption, carbon emissions, water usage, and solid waste generation across all technical institutes.
- **Integration with Academic Curricula:** Working alongside academic departments to embed sustainability modules into technical degree programs and vocational training.
- **Stakeholder & Government Engagement:** Partnering with Iraqi ministries, governorate environmental directorates, and international organizations to execute climate adaptation projects.

Institutional Support & Operational Budget

To ensure the team's long-term effectiveness, ATU provides dedicated resources including:

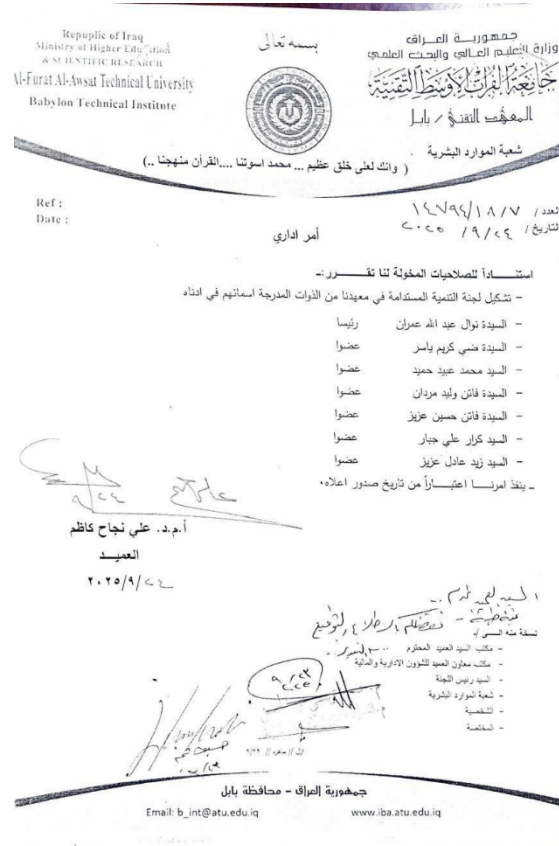

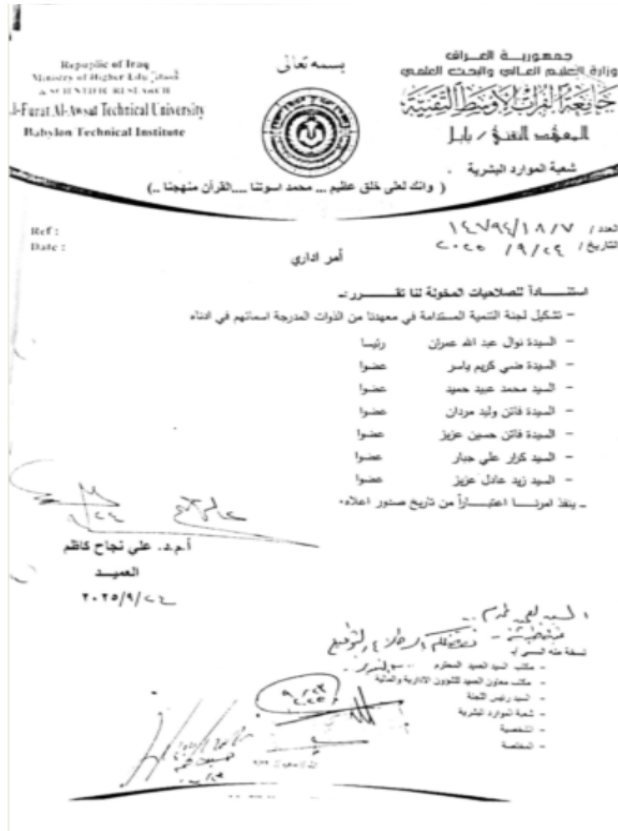

- Annual dedicated operational budget allocated specifically for sustainability team activities and campus greening.
- Permanently equipped central office within the university administration building.
- Full executive authority to request environmental data from all university colleges, centers, and administrative departments.

The Sustainability Unit at Al-Furat Al-Awsat Technical University was officially established in **2022** to coordinate and oversee sustainability initiatives across the University.

In **2025**, the University restructured its organizational framework by integrating the Sustainability Unit into the **Quality Assurance and University Performance Department**, strengthening institutional governance and sustainability management. To ensure effective implementation across all campuses, the University has appointed **Sustainability Coordinators (Liaison Members)** in each of its **16 colleges and institutes**. These coordinators act as official representatives of the Sustainability Unit and are responsible for collecting sustainability data, monitoring SDG-related activities, coordinating environmental and community initiatives, and supporting the University's participation in international sustainability rankings such as **UI Green Metric**.

The Sustainability Unit centrally supervises and coordinates sustainability planning, reporting, monitoring, awareness campaigns, and continuous improvement throughout all university formations.

Number of Staff Assigned to the

Sustainability Office

Position	Number
Head of Sustainability Unit	1+ 10
Sustainability Liaison Coordinators (Colleges & Institutes)	16+32
Total Sustainability Network	17+
	42

Total: 59 (Staff Assigned to the Sustainable Committees)

Sustainability Office Structure

The Sustainability Unit at Al-Furat Al-Awsat Technical University is located within the Presidency of the University and operates under the **Quality Assurance and University Performance Department**.

The Unit is managed by the **Head of the Sustainability Unit** , who is responsible for planning, coordinating, monitoring and evaluating sustainability initiatives across the University.

To ensure effective implementation at the institutional level, the University has established a network of **16 Sustainability Liaison Coordinators**, representing all colleges and institutes. Each liaison coordinator leads a local sustainability

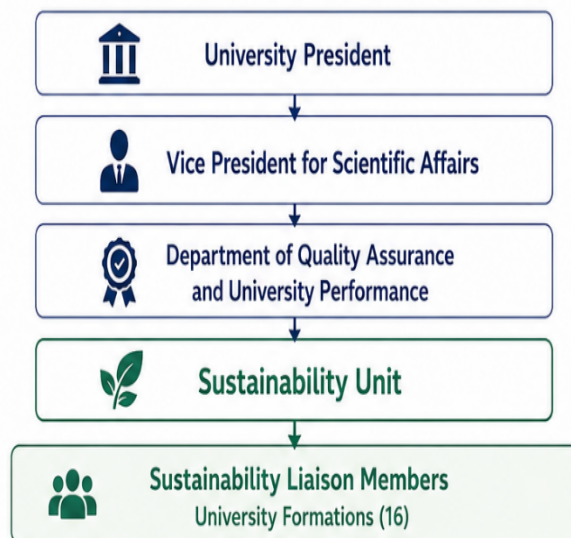

committee within their respective formation and is responsible for collecting sustainability data, documenting activities, coordinating SDG-related initiatives, and submitting monthly reports to the Sustainability Unit.

The Sustainability Unit reviews, verifies, consolidates, and analyzes all reports received from the 16 formations before preparing the University's sustainability reports and supporting participation in international sustainability rankings, including UI Green Metric.

ORGANIZATIONAL STRUCTURE OF THE SUSTAINABILITY UNIT

AL-FURAT AL-AWSAT TECHNICAL UNIVERSITY

1 Engineering Technical College – Najaf	9 Polytechnic College – Karbala
2 College of Health and Medical Technologies – Kufa	10 Technical Institute – Babylon
3 Administrative Technical College – Kufa	11 Technical Institute – Najaf
4 Al-Mussaib Technical College	12 Technical Institute – Al-Mussaib
5 Engineering Technical College of Oil and Energy	13 Technical Institute – Kufa
6 College of Medical Rehabilitation and Prosthetics	14 Technical Institute – Samawah
7 Health and Medical Technologies College – Babylon	15 Technical Institute – Rumaitha
8 Polytechnic College – Al-Diwaniyah	16 Higher Institute of Educational Technologies

**Description:**

Achieving the sustainable development goals is the means to achieve the well-being of current generations while preserving the shares of future generations. The university seeks to be sustainable as a scientific and cultural edifice for its students and affiliates and to have a social impact now and in the future. This requires making more efforts to strategically plan its activities, rationalize the use of financial and natural resources (water and energy), and work to establish the rules for exploiting and preserving renewable natural resources while preserving, developing, and continuously supporting human resources. In this way, it contributes to achieving the seventeen sustainable development goals, one of which cannot be effectively achieved unless it helps in achieving the other goals.
